

The **Kingfisher Amateur Radio Society** was created in October of 2023 by a group of local HAM's and the Kingfisher Memorial Library.

The purpose is to promote the Amateur Radio hobby especially among our youth.

Stations are being installed at the Library to cover all bands. We are hoping to be able to talk to the ISS when the astronauts are on the air. A HEXX beam antenna will be used for HF contacts across the US and world.

We meet monthly at the Library (505 W Will Rogers, Kingfisher OK 73750) beginning at 5:30 pm on the 2nd Monday.

Each Monday excluding meeting night we have a friendly Net on the local repeater on frequency 146.640 Mhz beginning at 7:00 pm. All Amateur operators are welcome.
